ACCEPTABLE WARNING STATEMENTS

Under section 25603 of the new Proposition 65 regulations there are 7 acceptable warning statements that may appear on a consumer product. Those 7 statements are divided into both a long form and short form version. The **long form** will call out the individual chemicals names that are present within the product, while the **short form** (on product warning) will omit the chemical names. Both versions are supported by zulily within the compliance tab of the event approval process.

The chart on the following pages outlines the 7 acceptable warning statements under Proposition 65 and how to select each warning statement within the Compliance tab.

Selecting various options will change the warning statement that can be viewed in the preview field to the right of the screen. Any one of the 7 warning statements is acceptable provided it matches the warning messaging that appears on the product being offered to zulily. This is the exact messaging that will be displayed to California customers on the zulily website.

zulily Vendor Portal How-To Guide Event Readiness & Approval Compliance & Proposition 65

As you check the appropriate boxes, you will be provided with an opportunity to enter chemical names as necessary to produce the messaging you have on your product. Please review the preview window to the right of the screen. As you select different options you will see the warning statement change to match your input values.

Be sure the warning statements in the preview window match the warning statement on your product.

Please refer to the chart below & on the following pages to identify the appropriate warning message to pass to zulily.

Warning Statement Options

- Cancer – www.P65Warnings.ca.gov

Product Description

The screenshot shows the Zulily product description form. On the left is the Zulily logo with the word 'IMAGE' below it. To the right, there are two checkboxes: 'Cancer Causing Chemicals?' which is checked (indicated by a red box), and 'Reproductive Harm?' which is unchecked. Below the 'Cancer Causing Chemicals?' checkbox is a dropdown menu showing '(0)'. To the right of these checkboxes is the text '- Optional: Add Chemicals -'.

- Reproductive Harm – www.P65Warnings.ca.gov

Product Description

The screenshot shows the Zulily product description form. On the left is the Zulily logo with the word 'IMAGE' below it. To the right, there are two checkboxes: 'Cancer Causing Chemicals?' which is unchecked, and 'Reproductive Harm?' which is checked (indicated by a red box). Below the 'Reproductive Harm?' checkbox is a dropdown menu showing '(0)'. To the right of these checkboxes is the text '- Optional: Add Chemicals -'.

Selection Options

Short form – This warning statement can be selected by checking the Cancer check box.

Entering any chemical name(s) into the drop-down option will change the warning message to long form.

Short form – This warning statement can be selected by checking the Reproductive Harm check box.

Entering any chemical name(s) into the drop-down option will change the warning message to long form.
